

Green Baby Lima 'Emperor'

New high yielding green baby lima that is ideal for Mid-Atlantic bean production!

PROFILE

Emperor is a green baby lima bean variety developed and distributed by ADM Seedwest. It is an upright and determinate variety that is well adapted for production in Delaware, Ontario, Wisconsin, and the Pacific Northwest. Emperor produces medium, flat green seeds. Emperor maturity is similar to Meadow, and approximately 3 days later than Cypress. Emperor has uniform pod and seed setting characteristics which lead to reduced split-sets at harvest. Excellent cold soil tolerance makes Emperor an adaptable variety that can be used for early or late plantings in the Mid-Atlantic region. From 2012 to 2021, the average succulent seed yield of Emperor was 3766 lb/acre (9 year/location environments) – which is a 340 lb/acre improvement over the variety Meadow.

TRIAL DATA

Strengths

- High yield potential in Delaware, Ontario, and the Pacific Northwest
- Uniform maturity that is ideal for green-shell harvest and succulent green baby lima production
- Excellent cold soil tolerance
- Upright plant architecture that is amenable to direct harvest using lima bean viners

Plant Type	Determinate bush (plant type I)
Seeds per Pound (dry)	1242
Days to Flower	52
Days to Green Shell Maturity	79
Days to Maturity	110 to 115
Height	45 cm
Disease	Resistant to downy mildew Race F
